## **DETAILED ACTION**

### ***Terminal Disclaimer***

1. The terminal disclaimer filed on 5-1-02 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 6,245,594 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Election/Restrictions***

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I – drawn to a method of exposing conductive structures.

Species II – drawn to a method of forming a “solder mask”

Applicant’s previous response is unclear, where all claims are said to be part of “Species II” [page 3], yet claim 1, for example, does not use the term “solder mask”. Applicant’s next response must clarify the meaning of “solder mask”, for the examiner to properly determine the patentably distinct subject matter among the pending claims, to confirm a proper restriction in the case.

Unfortunately, the specification does not clearly present patentably distinct subject matter as separate figures or embodiments, so the examiner needs help to understand what applicant means by “solder mask”, before making a proper restriction.

The examiner does not understand how claims 33 and 36 containing the term "solder mask" are "generic to both Species I and Species II" as indicated by applicant at page 3 of paper 6, when independent claims of Species I do not include the term "solder mask". That is, it is unclear where the limitation of a "solder mask" appears in the claims drawn to Species I.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evan T. Pert whose telephone number is 703-306-5689. The examiner can normally be reached on M-F (7:00-3:30).
